

POMEGRANATE CULTIVATION IN VARGANZA

Varganza village is situated in Kitob district of Kashkadarya region and it is famous for its pomegranates. Pomegranates, cultivated here are distinct with their appearance, taste and abundance of vitamins in their content.

Relying on the knowledge and experience of their ancestors in pomegranate cultivation Varganza gardeners manage to get abundant harvest. Image of pomegranate can be met in many objects and used as the symbol of productivity and prosperity and therefore it demands special attitude. There is no yard in Varganza without a pomegranate.

The natural conditions, water, soil of Varganza and farmers' rich experience, which is being passed through the centuries, is the reason of cultivating dozens of pomegranate sorts and sale of such pomegranates not only in Uzbekistan but in neighboring countries as well. Among these pomegranates it is possible to see pomegranates, starting from big and sweet stoned ones, until dark red and bittersweet types in different sizes and shapes.

Varganza population knows the ways of keeping pomegranate barks as afresh as they have not been cut. From the time when there were no modern cooling instruments in village conditions, up to nowadays, Varganza pomegranates exist in all seasons of the year. These informs about reaching perfection in the sphere of pomegranate cultivation and preservation.
